3" Solid Northern Hard Maple With Ogee Edge

The simple beauty of true Butcher Block is undeniable. The clean crisp lines and the honest display of Solid Northern Hard Maple compliments a wide variety of design styles. Butcher block feels at home in a country setting as well as the most sophisticated decors.

We at Michigan Maple Block Co. are proud of our 120 years of manufacturing expertise. We have taken the very best of today's technology and married it to our years of experience in producing butcher block to create this 3" top.

The top features a 3" Ogee edge detail which creates an elegant look. The overall shape of the top is up to you. Full radius ends, step backs and graceful rounded corners are all available on this top. Shaped tops are not only acceptable but encouraged. Sizes range from 18" - 108" long by 12" - 58" wide. This gives you the flexibility to fit the most demanding locations.

Great care in the selection of materials and craftsmanship have gone into the construction of this solid maple island top. The top's rich appearance, distinctive grains, character marks and color variations are the purest expression of nature. Just as no two trees are alike, no two pieces of wood used in fabrication of this top will look exactly like another. No man-made material can duplicate maple's varied beauty and natural integrity. As with all wood products naturally occurring variations of color and grain do occur and should be seen as part of the natural beauty of your top.
